Tarps Manufacturing has grown into a premier supplier of specialized tarp products. Production of Trucking, Agricultural, and Construction - Containment tarps define the output. Quality, timely delivery, and cost effectiveness define the production value to our customers.

CONSTRUCTION TARPS - CONTAINMENT are primarily used to contain overspray, blasting, and debris. We provide heavy duty nylon for most projects that is the same as used in auto air bags. Other projects call for mesh tarps that allow good air flow. We can also produce large scale printed tarps like the 20'x30' flags used on Freedom Tower One.

TRUCKING TARPS are primarily roll tarp systems. We are Platinum dealers of Shurco Systems, and manufacture the actual tarps on site.

Custom work is the hallmark of a good install.

AGRICULTURAL TARPS are usually for grain cover or equipment covers. TARPS can produce these covers for any size install.

NYLON - VINYL - POLY MESH - CANVAS
